

# Examine Nature

Find something in nature that really interests you. It could be an insect, plant, worm, flower, or any other object that you think is neat. Look at it really closely; use a magnifying glass if you have one. Draw what you see and try to label its parts!

## You Need:

- magnifying glass
- pencil or crayons
- paper and clipboard

When you get home, look in a field guide or on the internet to find out more information about your object.

Whatever you move or disturb, put it back where you found it!

**Draw what you see!**

What is it? \_\_\_\_\_
